MS WORD PRACTICAL LAB

Exercises for 1st-Semester BS Students | Duration: 2 Hours

Learning objective: Practise essential Microsoft Word skills by creating a professional university assignment that includes formatted text, lists, a table, an image, and page-layout elements.

Student Name: _____ **Roll No.:** _____

Department/Section: _____ **Date:** _____

Exercise 1 — Document Formatting (15 minutes)

• Create a new Word document titled *The Role of Information Technology in Education*.

• Set the page size to A4 and margins to Normal.

• Format the title as 20 pt, bold, and centered.

• Write two paragraphs of 5–6 lines each about the topic.

• Set the body text to Times New Roman, 12 pt, justified, with 1.5 line spacing.

• Bold important words and underline one sentence.

Exercise 2 — Bullets, Numbering and Headings (15 minutes)

Section A: Benefits of IT

• Online learning

• Fast communication

• Easy access to information

• Digital collaboration

Section B: Steps to Prepare an Assignment

1. Research the topic.

2. Organize the information.

3. Write and format the content.

4. Proofread and save the document.

Apply the Heading 1 style to each section and adjust indentation where needed.

Exercise 3 — Create and Format a Table (20 minutes)

Create the following table in Word and place the heading **Semester Results** above it.

Course	Credit Hours	Marks
Programming Fundamentals	3	85
Applied Physics	3	78
ICT	2	90
English	3	82
Calculus	3	88

• Apply a professional table style and shade the header row.

• Bold and center the header text.

• Adjust column widths and align the data neatly.

Exercise 4 — Insert a Picture and Caption (15 minutes)

• Insert a relevant picture related to computer technology.

• Resize the picture without distorting its proportions.

• Try a text-wrapping option such as Square or Top and Bottom.

• Center the picture and add the caption: *Figure 1: Information Technology in Education*.

• Add a page border or a subtle design element.

Exercise 5 — Page Layout, Header and Footer (15 minutes)

• Insert a header containing: *BS Computer Science — Semester 1*.

• Insert page numbers in the footer.

• Insert a page break before a new section titled *Conclusion*.

• Keep paragraph spacing consistent throughout the document.

• Save the file as **StudentName_MSWordLab.docx**.

Exercise 6 — Final Challenge: Professional Assignment (20 minutes)

Turn your document into a mini university assignment. Include all of the following:

■ A cover page with assignment title, student name, roll number, department, subject, and submission date.

■ Consistent Heading 1 and Heading 2 styles.

■ At least one numbered list and one bulleted list.

■ A formatted table and an image with a caption.

■ A conclusion of at least four lines.

■ A spelling and grammar check.

Save the final version and show it to the instructor before leaving.

Suggested 2-Hour Lab Schedule

Time	Activity
0–10 min	Demonstrate essential Word tools and file saving
10–25 min	Exercise 1: Formatting
25–40 min	Exercise 2: Lists and headings
40–60 min	Exercise 3: Tables
60–75 min	Exercise 4: Images
75–90 min	Exercise 5: Page layout
90–110 min	Exercise 6: Assignment challenge
110–120 min	Final checking and submission

Practical Assessment Rubric — 20 Marks

Skill	Marks
Text formatting and paragraph alignment	4
Lists and heading styles	3
Table formatting	4
Picture insertion and wrapping	3
Page layout, header/footer and numbering	4
Correct file name and final submission	2
TOTAL	**20**

Extra Tasks (if you finish early)

• Use Find and Replace to replace “IT” with “Information Technology” where appropriate.

• Insert a hyperlink to a relevant educational website.

• Use Insert → Equation to type a simple mathematical equation.

• Create a two-column newsletter about computer science.

• Export the final assignment as a PDF.

Instructor tip: Demonstrate each tool briefly, then ask students to perform the task independently. Encourage them to explore the ribbon and use Help when they cannot remember a command.
